

Irsyan Ramadhan

Fresh Graduate – Computer Engineering

Banda Aceh | +6288214717802 | irsyanramadhan72@gmail.com | [Linkedin](#) | [Github](#) | irsyan12.github.io

SUMMARY

I am Irsyan Ramadhan, a recent graduate of Computer Engineering (cum laude, GPA 3.67/4.00) from Syiah Kuala University with a strong interest and experience in mobile and web development. I specialize in using Flutter, and modern web technologies such as React and Node.js. With a passion for building scalable digital solutions, I have also explored deep learning and IoT development through academic and personal projects. I am actively involved in student organizations and technical competitions, and am proficient in Python, Dart, JavaScript, PHP, and TypeScript.

EXPERIENCE

Computer Programming Lab Assistant

Aug – Dec 2024

Syiah Kuala University

- Guided more than 30 students in basic and advanced Python practicum sessions.
- Explained programming concepts interactively and provided guidance on problem solving and debugging.
- Assessed and provided feedback on practicum assignments and helped improve students' understanding of programming logic.
- Coordinated with other lecturers and assistants to ensure the smooth running of practicums each week.

Team Leader & Mobile Developer – PKM-KC 2024

Feb – Dec 2024

Project Title: “Mobile Application for Classifying the Faces of Children with Autism Using User-Friendly and Efficient MobileNet V2-Based Computer Vision”

- Led a team of 4 people in the 2024 PKM-KC national research grant competition, with the project successfully funded by the Indonesian Ministry of Education.
- Developed a Flutter-based mobile application that classifies the facial features of autistic children using MobileNet V2 based on facial images.
- Focused on creating a user-friendly and efficient application, optimized for performance on mobile devices with limited resources.
- Managed the overall implementation of the project, including task coordination, milestone monitoring, and communication with university advisors and the program.

Web Developer – CMD HIMATEKKOM 2024

Jul – Sep 2024

Computer Multi Challenge Day

- Developed a web-based quiz platform for the Computer Olympiad event during CMD 2024, organized by HIMATEKKOM (Computer Engineering Student Association).
- Built the application using React.js for the frontend and Firebase for authentication and data storage.
- Implemented an admin dashboard to manage and view participant scores efficiently.
- Deployed the application by building the React project and hosting it on the university server using Plesk Panel.

Machine Learning Cohort – Bangkit Academy 2023

Aug 2023 – Jan 2024

Led by Google, Tokopedia, Gojek, & Traveloka

- Completed the Machine Learning path in the Bangkit Academy, a prestigious Kampus Merdeka program supported by top Indonesian tech companies.
- Gained hands-on experience in machine learning and deep learning, including supervised/unsupervised learning, CNNs, and model deployment.
- Worked on a capstone project involving real-world machine learning implementation using TensorFlow and cloud platforms.
- Collaborated in cross-functional teams with mobile and cloud computing cohorts to deliver an end-to-end solution.

ORGANIZATIONAL EXPERIENCE

Staff of Human Resource Development (PSDM) – HIMATEKKOM

Jan - Dec 2024

Syiah Kuala University

- Contributed to the development and coordination of internal programs to enhance member skills and engagement.
- Actively involved in planning, organizing, and evaluating various student development events.

Event Coordinator – National Seminar HIMATEKKOM

Jan - Dec 2024

Syiah Kuala University

- Contributed to the development and coordination of internal programs to enhance member skills and engagement.
- Actively involved in planning, organizing, and evaluating various student development events.

EDUCATION

Syiah Kuala University

Jan - Dec 2024

Bachelor's degree - Computer Engineering (cum laude – GPA 3.67/4.00)

- Bachelor's Thesis: “Development of a Mobile Application for Facial Classification of Children with Autism Using Computer Vision Based on MobileNetV3”
- Concentration in Multimedia Technology, with a strong interest and specialization in Machine Learning and web and application development.

TECHINICAL SKILLS

Languages:

- Indonesian – Native
- English – Intermediate

Programming Languages:

Dart, HTML5, CSS3, JavaScript, TypeScript, Python, Basic knowledge of PHP and C

Frameworks & Libraries:

Flutter, React.js, Next.js, Node.js, Express.js

Tools & Platforms:

Firebase, Git, GitHub, VS Code, Figma, Postman
